INDEX TO VOL. XXXII

ABSORPTION, of fat by stomach, 358.
——, of water by skin, 286.
——, relation to osmotic pressure, 1.
Adrenalin, effect on blood pressure related to pituitrin, 241.
Adrenal secretion, effect on muscle fatigue, 44.
Altitude, effect on circulation and respiration, 295.
Anemia, effect on nerve cells, 347.

BILE, excluded from intestine without external fistula, 417.
Blood, coagulation, action of thromboplastic substance, 211.
——, preparation of thrombin, 264.
——, thrombin and metathrombin, 266.
——, pressure, affected by pituitrin and adrenalin, 241.
—— ——, auscultatory phenomena compared with sphygmomanometer tracing, 427.
—— ——, relation to muscle fatigue, 221.
—— salts, relation to cardiac contraction, 165.
BURGE, W. E. The uniform rate of the destruction of pepsin by the passage of the direct electric current, 41.
BURKET, I. R. *See* CANNON and BURKET, 347.

CANNON, W. B., and I. R. BURKET, The endurance of anemia by nerve cells in the myenteric plexus, 347.
CANNON, W. B., and L. B. NICE. The effect of adrenal secretion on muscular fatigue, 44.
Carbohydrates, a source of fat, 200.
Carbon dioxide, estimation, 137.
—— —— production of nerves, 107.
CARLSON, A. J. Contributions to the physiology of the stomach.— V. The influence of stimulation of the gastric mucosa in the contractions of the empty stomach (hunger contractions) in man, 245.
——. VI. A study of the mechanisms of the hunger contractions of the empty stomach by experiments on dogs, 369.
——. VII. The inhibitory reflexes from the gastric mucosa, 389.
——. The tonus and hunger contractions of the empty stomach during parathyroid tetany, 398.
Circulation, in high altitudes, 295.
——, sphygmomanometer tracing and auscultatory phenomena, 427.
Colon, receptive relaxation, 61.

DENIS, W. *See* SCOTT and DENIS, 1.
Diabetes, sugar consumption in, 184.

EXERCISE, effect on bulbar centres, 315.
EISENBREY, A. B. *See* PEARCE and EISENBREY, 417.

FASTING, changes in liver, 309.
Fat, absorption in stomach, 358.
——, from carbohydrates, 200.
Fatigue, muscle, relation to blood pressure, 221.
—— ——, the threshold stimulus in, 438.

GALVANOMETER, Einthoven, technique, 329.
GESELL, R. A. On the relation of the pulse pressure to renal secretion, 70.
GREENE, C. W., and W. F. SKAER. Evidence of fat absorption by the mucosa of the mammalian stomach, 358.
GRUBER, C. M. *See* MARTIN and GRUBER, 315.
——. Studies in fatigue, 221.
——. Studies in fatigue. — II. The threshold stimulus as affected by fatigue and subsequent rest, 438.

HEART, contraction related to blood salts, 165.
HOSKINS, R. G., and C. MCPEEK. Is the depressor effect of pituitrin due to adrenal stimulation, 241.

HOWELL, W. H. Rapid method of preparing thrombin, 264.
Hunger, contractions of stomach, 369.
——, effect of water ingestion on fatty changes in liver, 309.
——, stomach contractions in parathyroid tetany, 398.
——, stomach, contractions on stimulation of mucosa, 245.

INTESTINE, receptive relaxation of colon, 61.
Irritability, of nerves, chemical hypothesis, 107.

KIDNEY, secretion affected by pituitary extract, 405.
KING, C. E., and O. O. STOLAND. The effect of pituitary extract upon renal activity, 405.
KITE, G. L. Studies on the physical basis of protoplasm. — I. The physical properties of the protoplasm of certain animal and plant cells, 146.

LIVER, fatty changes in fasting, 309.
LUTZ, B. R. *See* WEYSSE and LUTZ, 427.
LYMAN, H. The receptive relaxation of the colon, 61.

MACLEOD, J. J. R., and R. G. PEARCE. The sugar consumption in normal and diabetic (depancreated) dogs after evisceration, 184.
MCPEEK, C. *See* HOSKINS and MCPEEK, 241.
MACRAE, F. W., JR., and A. G. SCHNACK. The action of thromboplastic substance in the clotting of blood, 211.
MARTIN, E. G. On the relation of the blood salts to cardiac contraction, 165.
MARTIN, E. G., and C. M. GRUBER. On the influence of muscular exercise on the activity of bulbar centres, 315.
MAXWELL, S. S. On the absorption of water by the skin of the frog, 286.
MORGULIS, S., and J. H. PRATT. On the formation of fat from carbohydrates, 200.
Muscle, electric response in single twitch 336.
——, exercise, effect on bulbar centres, 315.
——, fatigue, relation to adrenal secretion, 44.
—— ——, relation to blood pressure, 221.
—— ——, the threshold stimulus, 438.

NERVE CELLS, endurance of anemia, 347.
Nerve centres, in bulb, affected by exercise, 315.
Nerves, respiratory, 95.
NICE, L. B. *See* CANNON and NICE, 44.

OSMOTIC PRESSURE, in absorption, 1.

PARATHYROID TETANY, related to contractions of fasting stomach, 398.
PARKER, G. H., and E. M. STABLER. On certain distinctions between taste and smell, 230.
PEARCE, R. G. *See* MACLEOD and PEARCE, 184.
PEARCE, R. M. A method of excluding bile from the intestine without external fistula, 417.
Pepsin, destruction by electric current, 41.
Phrenic nerve, origin, 65.
Pituitary extract, effect on kidneys, 405.
Pituitrin, pressor effect related to adrenalin, 241.
PORTER, W. T., and A. H. TURNER. Direct and crossed respiration upon stimulation of the phrenic, the sciatic, and the brachial nerves, 95.
PRATT, J. H. *See* MORGULIS and PRATT, 200.
Protoplasm, physical properties, 146.
Pulse pressure, relation to renal secretion, 70.

RENAL SECRETION, relation to pulse pressure, 70.
Respiration, in high altitudes, 295.
——, upon stimulation of phrenic, sciatic, and brachial nerves, 95.

SCHNACK, A. G. *See* MACRAE and SCHNACK, 211.
SCHNEIDER, E. C. Physiological observations following descent from Pike's Peak to Colorado Springs, 295.
SCOTT, G. G., and W. DENIS. The relation of osmotic pressure to absorption phenomena in the dog, 1.
SKAER, W. F. *See* GREENE and SKAER, 358.
Skin, absorption of water, 286.
Smell, and taste, 230.
SMIRNOW, M. R. The effect of water ingestion on the fatty changes of the liver in fasting rabbits, 309.

SNYDER, C. D. Electromyogram studies. — I. On some technical procedures in the use of the Einthoven galvanometer, 329.

——. II. On the time relations and form of the electric response of muscle in the single twitch, 336.

STABLER, E. M. *See* PARKER and STABLER, 230.

STOLAND, O. O. *See* KING and STOLAND, 405.

Stomach, empty,' contractions in parathyroid tetany, 398.

——, hunger contractions, 369.

——, hunger contractions upon stimulation of the mucosa, 245.

——, inhibitory reflexes from mucosa, 389.

Sugar, consumption in eviscerated dogs, 184.

TASHIRO, S. A new method and apparatus for the estimation of exceedingly minute quantities of carbon dioxide, 137.

TASHIRO, S. Carbon dioxide production from nerve fibres when resting and when stimulated; a contribution to the chemical basis of irritability, 107.

Taste, and smell, 230.

Thrombin, preparation, 264.

——, relation to metathrombin, 266.

TROLAND, L. T. A definite physico-chemical hypothesis to explain visual response, 8.

TURNER, A. H. Remarks on the origin of the phrenic nerve in the rabbit, cat, and dog, 65.

——. *See* PORTER and TURNER, 95.

VISION, physico-chemical hypothesis, 8.

WEYMOUTH, F. W. The relation of metathrombin to thrombin, 266.

WEYSSE, A. W., and B. R. LUTZ. A comparison of the auscultatory blood pressure phenomenon in man with the tracing of the Erlanger sphygmomanometer, 427.

DEC 2 1913

THE AMERICAN JOURNAL OF PHYSIOLOGY

EDITED FOR

The American Physiological Society

CONTENTS

PAGE

A Method of Excluding Bile from the Intestine without External Fistula. *By Richard M. Pearce and A. B. Eisenbrey* 417

A Comparison of the Auscultatory Blood Pressure Phenomenon in Man with the Tracing of the Erlanger Sphygmomanometer. *By Arthur W. Weysse and Brenton R. Lutz* 427

Studies in Fatigue. II. The Threshold Stimulus as Affected by Fatigue and Subsequent Rest. *By Charles M. Gruber* 438

INDEX 451

Vol. XXXII — No. VIII

Issued December 1, 1913

BOSTON, U. S. A.

1913

THE AMERICAN JOURNAL OF PHYSIOLOGY is issued monthly. The price of one volume, sent postage free to subscribers in the United States and Canada, is five dollars and fifty cents; to subscribers in other countries, five dollars and seventy-five cents. The price of Volumes One, Two, and Three will be six dollars to domestic subscribers, and six dollars and twenty-five cents to foreign subscribers. All subscriptions are payable in advance.

The price of the Index of Authors and of Subjects in the first thirty volumes is four dollars, payable in advance.

Subscriptions, manuscript, and all other communications should be sent to THE AMERICAN JOURNAL OF PHYSIOLOGY, Box 127, Back Bay P. O. Boston, Mass., U.S.A.

Copyright, 1913, by THE PLIMPTON PRESS

Printed at THE PLIMPTON PRESS, Norwood, Mass., U.S.A.

Entered at the Boston, Mass., Post Office, as second-class matter, Feb. 11, 1903.
